

Maintaining Trend Lines for Long-Term Planning

Longitudinal comparison of student achievement across years can be continued through the administration of the *Iowa Assessments*. The new ISASP will introduce a new scale and a standard setting study in the summer of 2019. Associating the new ISASP scores with the *Iowa Assessments* scores can provide districts with continued trend lines as the state transitions to the new assessment.

You are invited to partner with Iowa Testing Programs during this period of change to provide stability in your assessment data and link the two assessments.

Assessments at all grade levels are available in two ways:

Online

Focus on student achievement across all content areas by administering the *Iowa Assessments* online. The price is \$10.50 per student.

Paper and Pencil

Administer the *Iowa Assessments* by ordering the grade levels and quantities you need through Online Tools. The price is \$5.50 per student.
