

Assessing Students in Science at all Grades

Single Subject Administration of the *Iowa Assessments*

Every Student Succeeds Act (ESSA) requires that states test science in grades 5, 8 and 10. The Iowa Statewide Assessment of Student Progress (ISASP) will offer these three grades as part of the spring 2019 administration.

However, the *Iowa Assessments* can also be administered as a single subject (science) to help districts focus on science in other grade levels. This option is available in two ways:

Single Subject – Science Online

Focus on student achievement in science at all grade levels by administering the science test online. The price is \$6.00 per student.

Single Subject – Science Paper and Pencil

Administer only the science test of the *Iowa Assessments* by ordering the grade levels and quantities you need through Online Tools. The price is \$5.50 per student.
